

Jeff Kling is the CEO of INSITE – Broadbanding the Future.

INSITE is the group that can help you accomplish this objective. DBFOM (Design, Build, Finance, Operate, Maintain)

INSITE advises, facilitates & advocates for states, municipalities and utilities interested in developing an “Essential Services” strategy, building a network infrastructure, & leveraging breakthrough technologies to create a competitive edge.

Established in 2009, INSITE’S mission is to bring a complete open-architecture “essential services” infrastructure solution to its clients through all phases, including: Strategy, Funding, Design & Build, Manage, Monetize.

INSITE Solutions Include:

Building the business model to secure strategic and transformative investments in essential services infrastructure. Developing and implementing a strategy for monetizing horizontal and vertical wireless infrastructure and generating new revenue streams for municipalities and utilities. Providing wired and wireless broadband network planning and engineering for all levels of government. Providing energy markets support in navigating market changes, capitalizing on growth and developing new business services.

INSITE is currently generating a team response to the San Francisco Fiber to the Premise project that is estimated at \$1.8 Billion, as well as responding to the City of Atlanta Smart Infrastructure RFP and they have been working closely with Gainesville FL on a similar project just a smaller scale.

INSITE’s real focus is college towns as opposed to the large NFL cities because of the demographics and political will to get creative and industrious
