CHAD WILKEY, IIDA, NCIDQ, LEED AP

PRINCIPAL-IN-CHARGE

www.hlgstudio.com
cwilkey@hlgstudio.com

With a blend working with healthcare providers within hospital systems as well as with the educators who train them, Chad has the insights and experience into how real-life examples and the built environment can impact individuals to be life ready at any stage. With a keen focus on interdisciplinary design, Chad's approach to design stems from a desire to discover innovative user outcomes, target efficient data-driven design process and the creation of empathetic and engaging environments. Especially passionate about developing and implementing sustainable and health initiatives in the built environment Chad believes that all design professionals have a responsibility to lead by making decisions to support environmental resiliency as well as human health and wellbeing.
